

Safe Systems, Inc. Corporate Overview

Founded in 1993, Safe Systems is a national leader in providing network services exclusively to community financial institutions. As a technology partner, and recently ranked 15th on MSPMentor's worldwide Top 100 companies, Safe Systems has worked with over 500 banks and credit unions and manages over 12,000 network devices nationwide. We help financial institutions to select, implement, and manage network and Internet technology solutions that will build a strong foundation for the

institution's growth and success.

Safe Systems provides our clients with the best network solutions available by leveraging our relationships with the top financial industry vendors as well as our expertise and years in the industry. In addition, we have our Research and Development Department stay abreast of the best solutions for our clients. Unlike traditional network security approaches, Safe Systems works from the "inside out" to help protect systems from internal and external threats. This approach has enabled financial institutions across the country to maximize their technology investment and successfully address regulatory requirements and IT exams.

The level of support we provide to financial institutions is our hallmark and key differentiator. Our Network Operations Center is staffed with highly proficient and experienced Network Engineers who are not only Microsoft certified, but also understand the unique platform configurations of financial institutions.

Safe Systems is proud to boast:

- A 99% client retention and renewal rate
- An annual double-digit new client and revenue growth rate since 1993
- A company that is profitable, financially solid, debt-free, and 100% owned by banking industry veterans
- A strong regulatory compliance knowledge base

Whether you are looking to implement a new network or looking to upgrade, co-manage, or fully manage your systems, we can help. Our reputation for quality service and integrity allows us to continually grow in the community financial institution market. You are assured of receiving unbiased information, analysis, and recommendations, which makes Safe Systems "the technology partner for financial institutions."
