

Group Policy

What participants are saying:

"The instructor was down to earth and did not try to impress us with IT jargon. He spoke to us on our level so that we fully understood the information."

- Network Administrator,
Georgia Bank and Trust

"I have been to several classes and all of them have met and exceeded my expectations. The instructor is very open to questions and the hands on experience is fantastic."

- Network Administrator,
First Community Nat. Bank

"This class was very helpful to me and presented in a way that held my interest."

- Network Administrator,
Forest Commercial Bank

"Excellent presentation. Lots of good group discussion. The instructor always took the time to answer questions and there was as much one-on-one as necessary. Overall, came away much more comfortable with the process."

- Network Administrator,
State Bank of Georgia

GROUP POLICY TRAINING CLASS OBJECTIVE: To provide Network Administrators with hands-on experience working with Group Policy. At the completion of the two-day class, the attendee will have the ability to create a proper Active Directory structure which will enable them to control the network's users and computers in accordance with the financial institution's policies. Additionally, the Network Administrator will learn how to utilize several key features of Group Policy that will aid in the administration of the network. Network Administrators interested in learning what Group Policy is and what it can do for you. Group Policy allows for simple rollout of changes to all users and/or computers. Group Policy permits centralized software installation for programs such as Symantec Antivirus. Group Policy will help make your life as a Network Administrator more efficient and organized.

Two-day training class covering:

- The benefits of Active Directory
- The proper structure of Active Directory
- How to apply Group Policy to different users and computers
- How to update Group Policies
- How to create default Group Policies
- How to create custom Group Policies
- How to use Group Policy for quicker software installations
