

Network Administrator

What participants are saying:

"The instructor was down to earth and did not try to impress us with IT jargon. He spoke to us on our level so that we fully understood the information."

- Network Administrator,
Georgia Bank and Trust

"I have been to several classes and all of them have met and exceeded my expectations. The instructor is very open to questions and the hands on experience is fantastic."

- Network Administrator,
First Community Nat. Bank

"This class was very helpful to me and presented in a way that held my interest."

- Network Administrator,
Forest Commercial Bank

"Excellent presentation. Lots of good group discussion. The instructor always took the time to answer questions and there was as much one-on-one as necessary. Overall, came away much more comfortable with the process."

- Network Administrator,
State Bank of Georgia
Safe Systems, Inc.

NETWORK ADMINISTRATOR TRAINING CLASS OBJECTIVE: To provide the Network Administrator with knowledge of the computer network and how it works. At the end of this class, the Network Administrator will have the ability to take a new PC, add it to the domain, install a printer, create a user in the system, and log in as that user. In addition, Administrators should gain an understanding of how to manage the software installed on their network that is aimed at meeting ensuring regulatory compliance. These programs include WSUS, Antivirus, EMCO, NetComply, etc.

Two-day training class covering:

- Hardware Basics
- Operating System Basics
- Outline Steps to Join a PC to a Domain
- Overview of TCP/ IP
- Adding Printers in a Microsoft Operating System Environment
- Active Directory
- User Creation and Maintenance
- File and Share Level Permissions
- Group Memberships
- Batch File and Container Login Scripts
- Roaming User Profiles
- Event Viewer
- Symantec Antivirus
- Exchange and MDAemon
- Reading Backup Exec Logs
- Restoring with Backup Exec
- Using EMCO
- Creating EMCO Reports
- WSUS Administration
- Approving Patches
- NetComply
