

## **Safe Systems, Inc.**

### IT and Security Services for Community Banks and Credit Unions

Safe Systems was founded in 1993 as a provider of IT and security services exclusively tailored for community financial institutions, and has become one of the most trusted providers in the industry. Safe Systems can provide a complete IT department or simply function as an extension of a bank or credit union's team. Its services include IT support and managed services, internal network/cloud design and installation, hosted email, business continuity and disaster recovery, compliance consulting, security services, and IT and compliance training. Safe Systems' annual double-digit new client and revenue growth, as well as its 99 percent retention and renewal rate solidifies its position in the industry.

The company has become one of the leaders in the industry, managing hundreds of financial institutions representing more than \$61 billion in combined assets, 1,100 locations and more than 20,000 network devices. High levels of customer service, expertise in the financial industry and experienced, dedicated compliance resources are among the factors that differentiate Safe Systems from its competitors. As a result, clients are able to reduce operating costs, increase productivity and exceed regulatory requirements. An award-winning technology partner for community financial institutions, Safe Systems' solutions have fully redundant data centers and has been the recipient of Bank News 2013 Innovative Solutions Award, CRN's Top 40 Most Innovative MSPs, 2015 Inc. 5000 Honoree, and was ranked number one on the Ingram Micro 2015 SMB Channel Partner 500 List.

**Abridged Overview**

Founded in 1993, Safe Systems is a national leader in providing fully-compliant IT and security services for community banks and credit unions. The company's mission is to establish a strong foundation for financial institutions' growth and overall success by assisting them in the selection, and implementation and management of technology solutions.
